### DETAILED ACTION

This application claims priority to Provisional Application # 60/398,523 filed on 7/25/2002. Applicant's priority is acknowledged.

### *Specie Election*

This application contains claims directed to the following patentably distinct species of the claimed invention:

1. dysfunctions, damage and/or injuries to organs, tissues and/or cells, diseases or conditions, enumerated in claims 1, 18-19.
2. therapeutic agents and compounds selected, enumerated in claims 8-17, 24-33.

Each of the above listed species are distinct because they encompass various types of diseases or conditions and unrelated chemical moieties. Further, each recited species acquire a separate status, because they can be classified in different classification. Different classification of species is *prima facie* evidence of undue burden of search.

Accordingly, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant's election should identify **one** dysfunction, damage and/or injuries to organs, tissues and/or cells, disease or condition and **one** therapeutic agent or

compound. Applicant is also requested to identify which claims are directed to the elected species. Currently claims 1-33 are generic.

Upon allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added are the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because the above species election requirement is complex, a telephone call to the applicant's agent to request an oral election was not made. See MPEP § 809.02(a).
